Creating Positive
Attachments, part 1

Normative Child Development

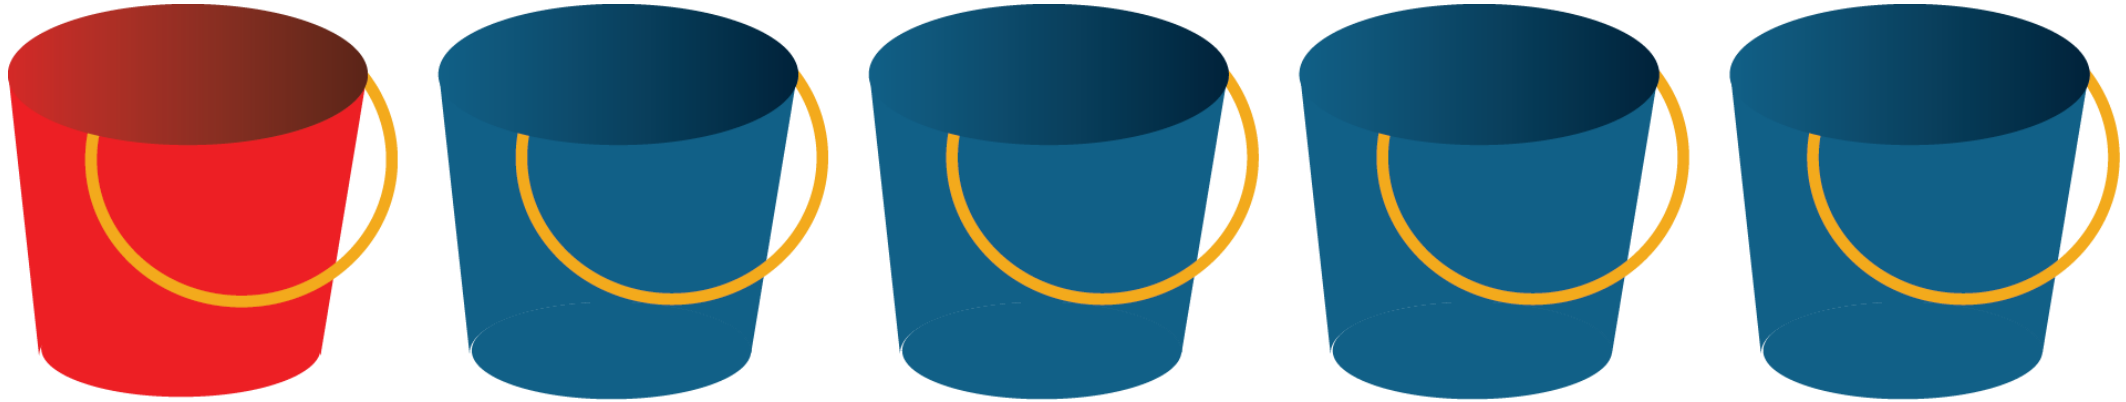

“I’ve Missed Critical Steps”

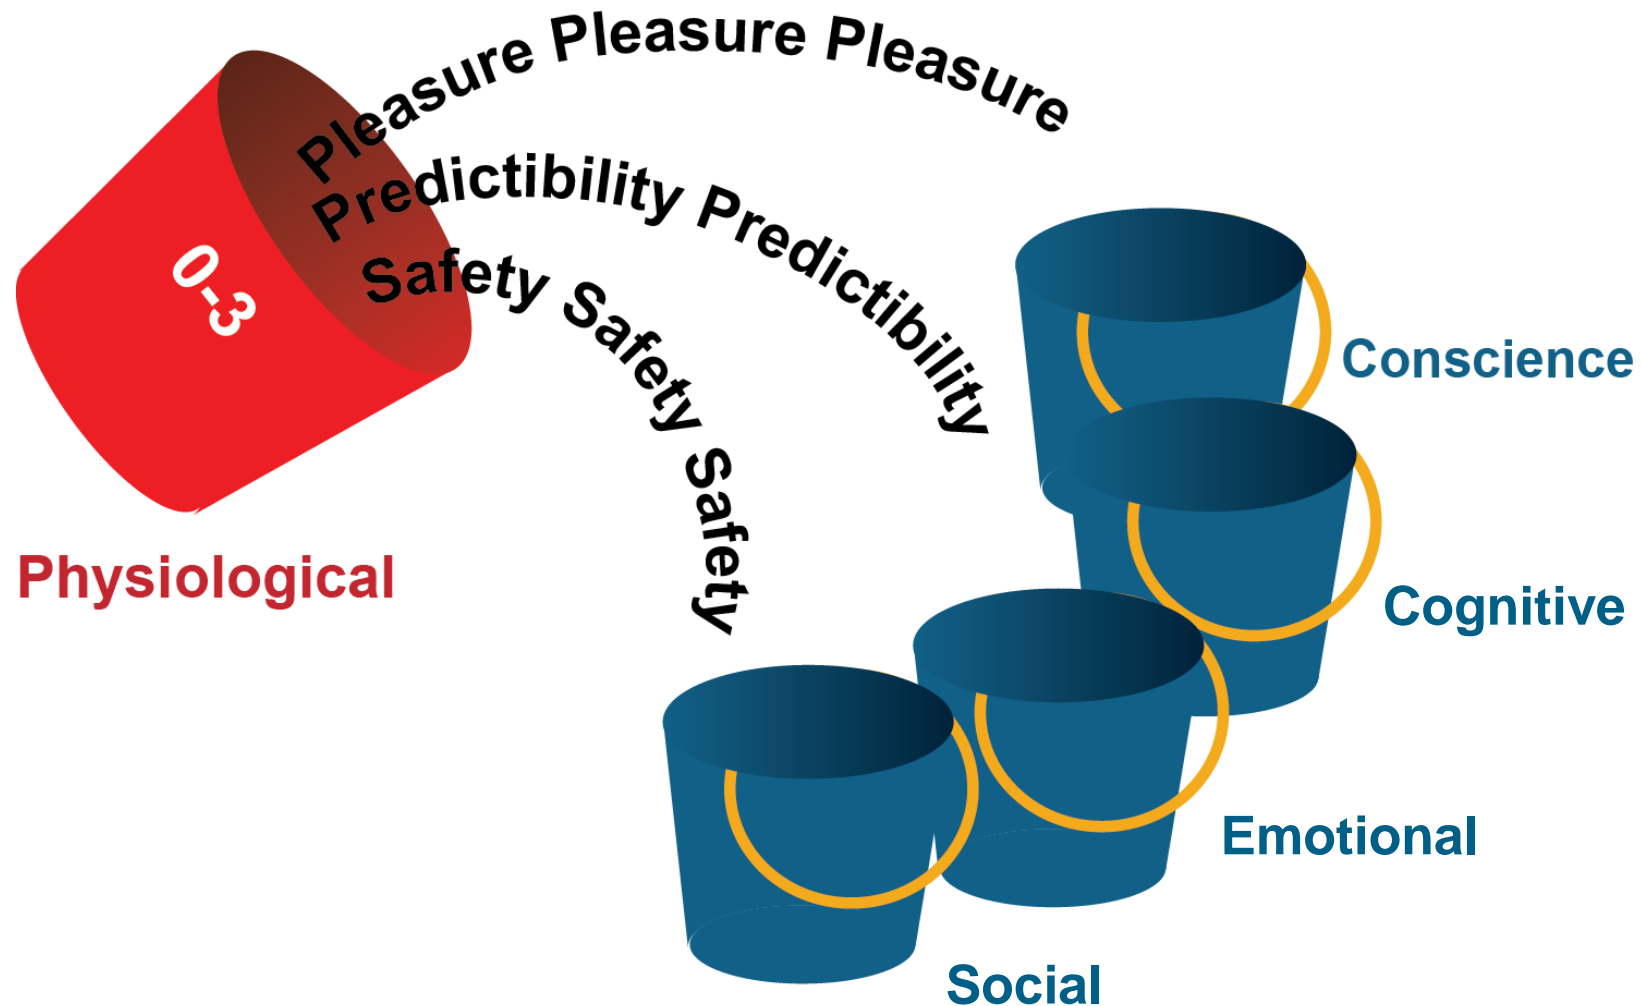

Child Development

A child is born with five empty “buckets of development”

How much “filling” did your child get?

Filling your child's developmental buckets

Punishment vs. Discipline

Punishment

To inflict pain or harm

Discipline

To teach (root: Disciple)

Attachment Precedes Discipline!

10 Things: Your Child Needs Every Day

Think Buckets!

Fidelity: What are we measuring?

Use of experienced facilitators

Experiential delivery of material

Participant engagement

Opportunities to apply techniques

**Core
Components**

Preliminary findings: Change in goals

Session

1

2

3

4

5

6

7

“Learn new parenting
skills for adoptive child.”

“I want to be a better parent!”

Preliminary findings: Change in goals

Session

1

2

3

4

5

6

7

“To navigate the difference in
developmental vs. biological age.”

“Develop new and different
attachment.”

Preliminary findings: Change in goals

Session

1

2

3

4

5

6

7

“Actively recognize own triggers.”

“To talk to my child more about birth parents in a way that is age appropriate.”

Integration of Concepts

“I am seeing ways to ‘fill the buckets.’”

“Lead by example, more active listening”

“Actively recognize my own triggers to try to minimize my response”

What are participants suggesting?

Offer at time of placement

“I am mindful each week how much help it would have been to have this information at the beginning of the placement.”

Expand scope

“A version of this class should be taught to educators. It would be amazing if teachers could reinforce what we are doing at home. Just think of the results!”
